LAB 1 REPORT

Course: Software Engineering
Lab: Lab 1

Student Name: *Phan Nguyễn Thảo Như*
Student ID: *524V0007*
Class: *24K50201*

I. Summary

- From lab 1 to 10, I learned about:
    - Creating a basic Windows Forms application and understanding the structure of a Form.
    - Adding controls to a Form and displaying text using Label controls.
    - Using Button controls and handling basic click events.
    - Getting user input by using TextBox controls
    - Processing and displaying data entered by the user.
    - Displaying notifications and messages using MessageBox.
    - Organizing controls and adjusting their properties for better layout.
    - Grouping controls logically on a Form.
    - Applying basic Windows Forms controls to complete a simple application.

II. HomeWorks

- Exc20:

- 
These exercises focus on using advanced layout and interface controls such as:

- MenuStrip
- ToolStrip
- StatusStrip
- TabControl
- SplitContainer
- FlowLayoutPanel
- TableLayoutPanel

For each exercise, I built a Windows Forms application, added the required control, and displayed the program output correctly on the form.
